BOOK SYNOPSIS

Featuring three dimensional, color coded illustrations, this classic work show the twelve major nerve systems connect the brain to body systems they control. These drawings clearly show the course and position of each nerve, as well as the functional modalities of each nerve. This way, students can learn not only the location of each nerve system, but also how they act in concert to perform specific functions. Its a tremendous teaching tool for all health sciences students in medicine, dentistry, pharmacy, nursing and physical therapy.
